## Here is what USDA/AMS had to say:

**Midwest:** Cream multiples increased on the low end, as no sub-1.00 multiples were relayed this week. Butter churning activity remains somewhat hearty, but cream is generally available for all uses in the last week of the month. Some butter makers are suggesting they expect similar price points in the early weeks of May.

**Northeast:** Cream demand is steady. Cream multiples moved one cent higher at the top of the All Classes multiples range.

**West:** Cream availability remains similarly in line with recent weeks. Cream multiples are unchanged this week. Demand for cream and condensed skim milk is stronger.
