Here is what USDA/AMS had to say:

Midwest: Cream remains widely available for all end users. Ice cream production is ticking higher, but butter makers say May availability is similar to April's, and there is no shortage of offers on the board for spot cream loads.

Northeast: Cream multiples were unchanged from last week.

West: Although a few stakeholders say less cream is finding its way to spot market offers, cream is generally available throughout the region. Cream multiples moved lower for the top of both ranges. Demand for cream and condensed skim milk is steady.
