Here is what USDA/AMS had to say:

Midwest: Cream availability is somewhat steady. Butter makers say spot cream availability is nearly nonexistent in the region, but Class II and Class III manufacturers are clearing spot cream at similar multiples to last week. Cream end users suggest a similar sentiment as do fluid milk processors regarding the potentiality of Labor Day availability.

Northeast: Cream availability remains tight. The All-Class cream multiples range was unchanged from last week.

West: West region cream sellers convey some requests from Midwest buyers for loads have been turned down. Cream demand is steady. Cream multiples contracted slightly.
